Anshika Vats

AI/ML Engineer — Deep Learning Enthusiast

+91-9024006237 vatsanshika923@gmail.com linkedin.com/in/anshika-vats github.com/vatsanshika923-prog

Summary

Aspiring AI/ML Engineer with knowledge of Machine Learning, Deep Learning, and Natural Language Processing. Skilled in Python, model development, data preprocessing, and problem solving. Currently exploring Generative AI concepts and building AI/ML projects focused on predictive analytics and computer vision.

Skills

Programming Languages: Python, SQL, Java, C++
Machine Learning: Regression, Classification, Model Evaluation, Data Preprocessing
Deep Learning: ANN, CNN, TensorFlow, Keras, MobileNetV2
Libraries & Tools: NumPy, Pandas, Matplotlib, Scikit-learn, Jupyter Notebook, Git, GitHub
Core Areas: Machine Learning, Deep Learning, NLP Basics, Computer Vision
Currently Learning: Generative AI, Large Language Models (LLMs)

Profiles

- **GitHub:** github.com/vatsanshika923-prog
- **LinkedIn:** linkedin.com/in/anshika-vats
- **LeetCode:** leetcode.com/u/AnshikaVats/

Projects

Boston House Price Prediction | *Python, Machine Learning* **2025**

- Developed a machine learning model to predict house prices using regression algorithms and data preprocessing techniques.
- Performed exploratory data analysis, feature selection, and data visualization using Pandas and Matplotlib.
- Trained and evaluated regression models using Scikit-learn to improve prediction accuracy.
- Enhanced understanding of regression workflows, model evaluation, and predictive analytics concepts.

Image Classifier using MobileNetV2 | *Deep Learning, TensorFlow* **2025**

- Built an image classification model using the MobileNetV2 deep learning architecture.
- Implemented image preprocessing, transfer learning, and model training using TensorFlow and Keras.
- Worked on computer vision concepts including feature extraction and image classification pipelines.
- Improved understanding of deep learning workflows and pretrained neural network models.

Telecom Customer Churn Prediction | *Python, Machine Learning* **2025**

- Developed a machine learning model to predict customer churn using telecom customer datasets.
- Performed data cleaning, feature engineering, and exploratory data analysis using Python libraries.
- Applied classification algorithms and evaluated model performance using accuracy metrics.
- Strengthened understanding of customer behavior analysis and predictive modeling techniques.

Certifications

- **Machine Learning with Python – IBM SkillsBuild**
- **Python Programming**

Education

Bachelor of Technology (B.Tech) in Computer Science **Expected Graduation: 2028**
Ajay Kumar Garg Engineering College *Current CGPA: 8.16 / 10*
